

Rubbermaid®

Premier

7H74, 7H75, 7H76, 7H77, 7H78, 7H79

Rubbermaid Premier is designed to resist typical stains that occur on plastic food storage containers when tomato based and other products are reheated in microwave ovens. To keep your new containers looking their best, we recommend the following:

- Follow microwave manufacturers recommendations when reheating food in Rubbermaid Premier containers.
- Excessive reheating or heating time may cause deformation of the container.
- Reheating foods containing curry seasoned with the herb turmeric will stain the containers. Rubbermaid Premier is designed to resist stains from tomato based foods.
- Do not use in conventional ovens, under browning elements, or on the stovetop.
- When microwaving frozen foods directly out of the freezer, always use appropriate microwave setting.
- Always vent lid by lifting rim enough to break seal before microwaving to avoid excessive steam build-up, and possible injury.
- Avoid abrasive cleansers or scratch pads when cleaning Rubbermaid Premier containers - these more abrasive cleansers may permanently scratch container surface.

Limited Lifetime Guarantee

Rubbermaid Premier Limited Lifetime Warranty:

Rubbermaid Premier Products are manufactured from the highest quality materials. Each piece has been carefully produced and inspected by experts to give you the ultimate in service and satisfaction. If during the life of the original user the product proves defective, we will replace that item through a certificate redeemable at any Rubbermaid retailer. This warranty does not cover damage caused by accident, misuse or abuse, which includes damage due to melting, warping, burning, or scratches. Please carefully review the instructions for proper use and care of the product.
